Enthusiastic Public Health and Community Medicine Specialist, with outstanding expertise in the fields of Healthcare Services and Management, Quality, Infection Control & Patient Safety. Health Education, Statistical methods & Digital Health Communication are core areas of my solid professional experience.

Healthcare and Quality Management specialist contributing to teaching principles of healthcare management to both undergraduates & postgraduates, and sharing in various management planning activities.

Since “Statistics and research methods” is one of my majors in which I'm very much interested, I continued studying and learning in this field in order to support my knowledge both theoretically and practically. Aiming to increase my expertise, I attended many statistics courses offered by the most reputable universities worldwide.

Always looking for a career challenging opportunity with a chance to add to my experiences as well as my potentials.

Expertise and Philosophy

My role as an academic staff member together with my postgraduate teaching experience have formulated my professional philosophy. It is based on my belief that raising community awareness and students' learning capabilities should be delivered through motivation and creating a positive encouraging learning environment, so as to direct recipients to excellence and outstanding performance.

Mastering the academic subject should be coupled with additional skills to match today's explosion in technology. Skills like ability
